# Localization

01	Main Settings	<ul style="list-style-type: none"><li>• Multi Chart of Accounts (Local Accounting Structure)</li><li>• Multi Currency (ALL)</li><li>• Segregation of users</li></ul>
02	IFRS and Local Tax	<ul style="list-style-type: none"><li>• IFRS</li><li>• Asset Multiple Books (<b>Corporate &amp; Tax Books</b>)</li></ul>
03	Fiscalisation ( <i>Profisc</i> )	<ul style="list-style-type: none"><li>• Cash Invoice</li><li>• Electronic Invoice, Warehouse Transfer</li><li>• Purchase Invoices</li></ul>
04	Integration	<ul style="list-style-type: none"><li>• External Invoices, through Web Services (API)</li><li>• Excel and office package</li></ul>

# Implementation comments

- System ready-to-go for operation
- Integration with Web external systems
  - This is possible on all modules, especially needed on :*
    - Sales Invoices (from external systems);
    - Assets (Asset Maintenance and Operations);
    - Purchase invoices and e-Invoices
    - Bank Statement and real-time Payments reporting
- Reporting through Business Analytics (BI)
  - Already predefined reporting and data models
  - Automatic reporting on predefined times

# Implementation comments

- Quick implementation (normal implementation in 3-5 months)
  - No installation required
  - Excel and open web services for integration
  - Quick learning process from users
- Main Security considerations
  - Users and Infrastructure maintained from Oracle
  - Backup and replication no different sites
  - Data maintained within EU
- Lower maintenance costs
  - System is automatically Updated each **3 Months**
  - Technical Services provided from Oracle
  - System operations at **anytime** and from **everywhere**
